

Systematic procurement – Europe-wide

Procurement logistics reduces your delivery processes and allows you to streamline and schedule your process chains. In order to optimise these processes, reliable collection from a large number of suppliers as well as delivery to you must be guaranteed.

We have adjusted to this and offer a Europe-wide integrated procurement system for groupage cargo. With 24plus Prolog, the procurement processes are IT supported and fully integrated.

The standard runtime is 24/48 h. 24plus Standard and the 24plus Speedtime product family can be booked additionally.

You can receive more details on all 24plus products from your local 24plus partner.
