

Systematic procurement Europe-wide

24plus Prolog

Procurement logistics reduces your delivery operations and enables you to streamline your process chains and manage them on a scheduled basis. To optimize these processes, both reliable pickup from a wide range of suppliers and delivery to your facility must be ensured.

We have adapted to these needs and offer a Europe-wide integrated procurement system for groupage cargo. With 24plus Prolog, procurement processes are IT-supported and fully integrated.

The standard transit time is 24/48 hours. 24plus Standard and the 24plus Speedtime product family can be booked as add-ons.

You can receive all the details about every 24plus product from your local 24plus partner.
